

# EMPEROR GOOSE

NACAULLEK • LEGHLEQ • LIGLIQPAK • MITILGRUAQ  
NEQLLEQ • QAGMANGIX • QAMGAANGIX

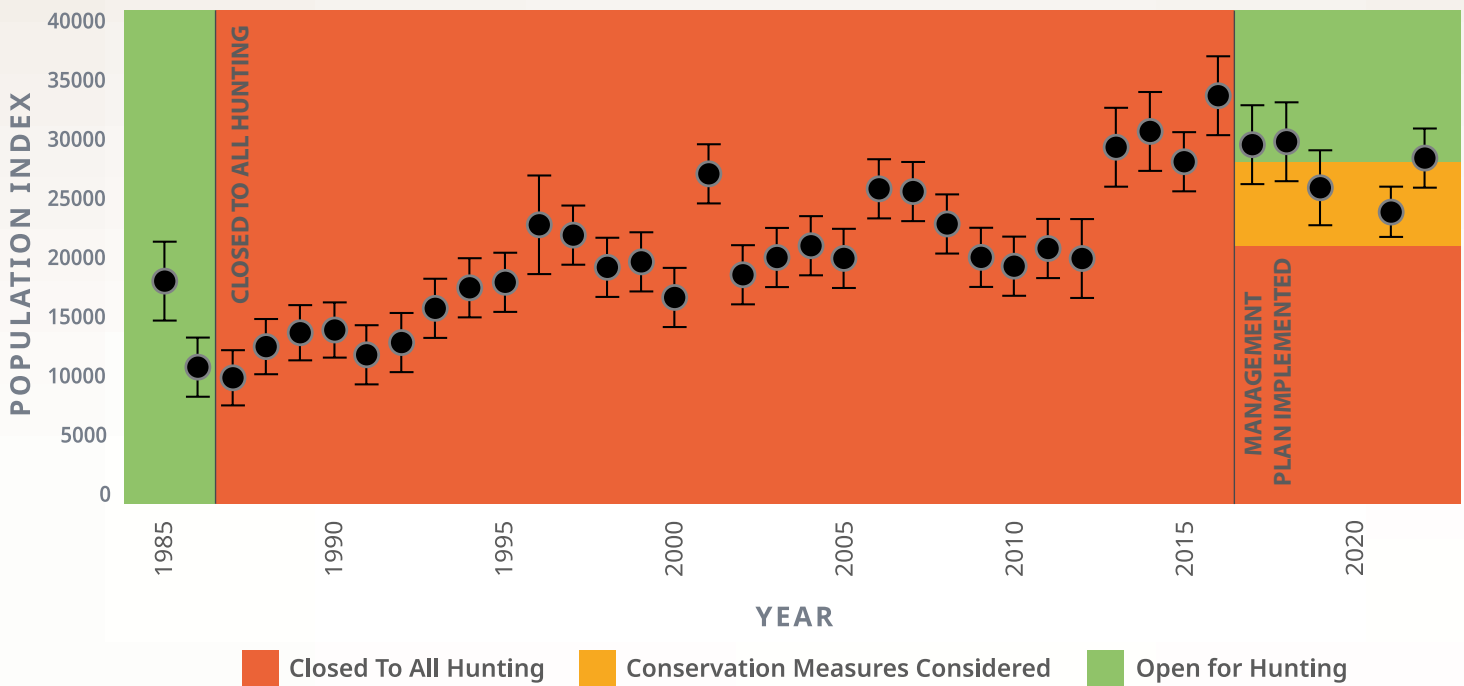

*It Takes All of Us to Protect Alaska's Goose*

*Anser canagicus*  
ORDER: Anseriformes  
FAMILY: Anatidae

## ACTION

The Emperor Goose population is near the closure threshold.  
Action now may prevent future closures.

### What Can Hunters Do?

- Do not take eggs. Egg harvest is closed until the population increases.
- When hunting, target juvenile birds to protect the breeding population.
- Protect nesting and brood rearing birds so the next generation of geese will grow.
- One shot, one kill. Accuracy protects the flock from injury.
- Take only what you need and "Hunt for the Future."

*Hunting responsibly is one of the few actions that can help Emperor Geese now and preserve hunting opportunities for the future*
